RELEVANT EXPERIENCE

Gao Wei Mathematics Cram School

Oct. 2024 - Present

IT Department Part-timer

- Developed a real-time tutor display system with a Vue (TypeScript) frontend and FastAPI (Python) backend, integrating Raspberry Pi Qt6 GUIs, WebSocket updates and media playback.
- Built and deployed a Vue + FastAPI interactive kiosk for students, featuring real-time (WebSocket) class updates, registration tools (補位, scholarships, surveys), and media playback.
- Built a full stack internal system that includes management of trial lessons, virtual machines, SMS and real-time class statistics, along with a secure (JWT) login system.
- Administer and deploy VMWare/Proxmox virtual machines and personal computers, with operating systems including Ubuntu Server and Windows 10.
- More projects detailed in my personal website: chodansbawige.com/projects.

Compass Public Relations

Jul. 2024 – Oct. 2024

Intern

- [AutoDMS](#) : Chrome extension + LINE chatbot + Firebase Functions that automates monotonous daily news monitoring.
